1) Create a database named course, with a table with the following structure:

SQL query:
```
CREATE TABLE `students` (
`name` VARCHAR( 15 ) NOT NULL ,
`surname` VARCHAR( 25 ) NOT NULL ,
`address` VARCHAR( 30 ) ,
`phone` INT( 10 ) UNSIGNED,
`dni` VARCHAR( 9 ) NOT NULL ,
`age` INT( 2 ) NOT NULL ,
`id` INT( 4 ) NOT NULL ,
PRIMARY KEY ( `dni` , `id` )
);
```

2) Add three new students by means of a HTML form, using the INSERT command.

3) Write a Php page named list, to display the information of the table 'students' in a web page (in table format).

Pepe	Ruiz de Ojeda	lope de hoyos 45	62256166	51422556	32	1
Luis	Martines lopez	monte 10		599112126	654546466	18	0

4) Write a .php web to find a given user (for example, with phone number XXXXX) displaying his data into a predefined field like this:

Nombre:
Apellidos:
Dirección:
DNI:

5) Once displayed his data, remove that user from the table.
